INTRODUCTION

Lung protocol is a decentralised marketplace that allows anyone to buy and sell products or services for cryptocurrencies on a global scale. The marketplace will support thousands of merchants and millions of listings, with its primary focus on no fees.

Sell and buy goods fast, secure and without commissions. Pay by crypto. Lung protocol is world's largest decentralized, peer-to-peer marketplace.

The computational efficiency of our protocol is powered by key code design features like forward and backward compatibility, component-based modular structure, and asynchronous core architecture.

We are focused on bringing the benefits of this new disruptive technology to future facing enterprises that recognise its transformative role in bringing real-world commercial advantage.

OUR VISION

Our intention is not to replace Fiat currency however, we aim to provide a unique approach to creating an ecosystem unattached to the current inflationary model. As we all know, Fiat currency is the foundational currency in which our society operates on a daily basis. Lung Protocol provides a reliable, stable and tax-exempt cryptocurrency to enable seamless transactions. A limited supply currency hosting safer transactions in an ecosystem that allows the token holders to have full control of their finances at all times. A limited supply currency in which there is no third-party requiring permission to interact with L2P

ABOUT PLATFORM

Lung protocol is a platform created for buyers and sellers all over the world. With an easy-to-use online store builder Platform, any seller is able to create their own storefront to sell their things, while making use of the Lung protocol platform's wide range of features for a minimal fee. Our service offers great opportunities for self-employed and entrepreneurs, small scale manufacturers, family businesses and makers of handmade crafts, including a selection of tools for direct customer feedback, bookkeeping, sales analysis, advertising and promotion, as well as a convenient, user-friendly interface.

Lung Protocol (L2P) powers our merchant storefronts and e-commerce ecosystem. Sell and buy goods fast, secure and without commissions. Pay by crypto.

Marketplace Website Template

A Decentralized Anonymous Marketplace built on top of the Lung blockchain.

ROADMAP

Q1 2020

Platform idea

Company formation

Q2 2020

Start community building

Airdrop campaign & bounty

Exchange listing

Q3 2020

Website development

Start development of IQ L2P API

Marketplace platform veta version

L2P list on CMC

Q4 2020

Lung Protocol Formation

Marketing and advertising

More attraction for investor

L2P target price 0.30\$

Q1 2021

Development of LUNG Blockchain subsystem

The integration with ETH Blockchain

Further development

More partnership and test net release

Q2 2021

Web wallet integrate

LUNG mainnet test

Fully launch own marketplace platform

L2P in top 100 in CMC

Q3 2021

ProgPow implementation

Consensus upgrade

Mobile wallet for Android & iOS

Q4 2021

Market place API

Market place website template

Privacy upgrade

Messenger to communicate between user and merchants

TOKEN INFORMATION

Token Name : Lung Protocol

Token symbol : L2P

Token type : ERC20

Token Decimal : 18

Token Supply : 75000000

Token contract :

0xee0f286776639cd363da810daf3e0623f82576b0

LUNG POTOCOL USED

Lung Protocol (L2P) with a low supply token only 75 million and from this supply 1% will be burn per year on the other hand we are giving away 35% to our valued community as airdrop and make it also good returns however 32% will distributed to our holders who will participate in recent selfdrop and this is all about our 1st stage of this mission.

Team must hold a good percentages minimum 15th month 20% and other sector 8% development purpose for future future even though 4% will distribute for promotion as huge marketing purpose.

SELFDROP

Lung Protocol decide to arrange a selfdrop program to deliver an amazing e commerce platform. As you all know for an e commerce platform community is the power to archive success for the future as well as you will be benefited by this path way there is a great chance to make 2x 3x money in crypto exchange after lunching your favorite L2P in the open market. This concept will bring you a financial freedom world.

Dear respectable community Lung Protocol is an ERC20 token now that is under ETHEREUM blockchain but very soon Lung Protocol will lunch mainnet for community betterment and to create the main vision in ecommerce sector.

Web API

Prebuilt plugins for ecommerce engines, Purchase button APIs, and documentation making Lung Protocol easy to deploy and use across mainstream ecommerce platforms.

Purchase API/Web plugins

API's and plugins are what makes escrow and other features of our network easy to use for anyone. With this functionality, users are not required to have any coding knowledge to create contracts and implement them in ecommerce-related ventures.

ABOUT TEAM

The Lung Protocol team has significant experience with the development. Members of the executive team also have extensive experience in the e-commerce sector with Shopping Cart Elite.

ABOUT CRYPTO COMMUNITY

The crypto community has been demanding for practical adoption, and Lung Protocol L2P will deliver an incentive-driven solution that connects businesses with the digital world of cryptocurrency. It's a platform where all crypto lover can use it and get your favorite product.
